## **DETAILED ACTION**

## Allowable Subject Matter

1. Claim 1-11 are allowed.

2. The following is an examiner's statement of reasons for allowance.

Rank et al. disclose the construction of an electric motor including a stator and a rotor which defines a rotor axis and includes at least a stack of laminations layered by sheets and provided with slots for receiving rotor windings, wherein at an end face of the at least one stack of laminations, there is provided at least one rotor end sheet which is made of high-strength fine-grain structural steel.

Kahle, Sr. teach the construction of a sew through exciter armature with integral banding rings having a rotor end sheet abutting laterally in a radial direction the stack of laminations, wherein the rotor end sheet has a flat thin configuration for the purpose of accomplishing the axial containment of the rotor.

Martini et al. teaches an electric motor, wherein the slots for receiving the rotor windings, are closed, or at least some of the slots have leakage orifices for the purpose of finding a method, which will adapt the projection welding process to the manufacture of a stack of laminations with inclined slots.

The prior art of record, taken alone or in combination, fails to teach the construction of an electric motor as described on independent claims 1 and 6, wherein the rotor end sheet has a flat thin configuration, and matches, at least in proximity of the rotor axis, a geometric shape of the sheets layered in the stack of laminations.

Application/Control Number: 09/720,520

Art Unit: 2834

Dependent claims 2-5 and 7-11 are considered allowable by their respective dependence

Page 3

on allowed independent claims 1 and 6.

Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Pedro J. Cuevas whose telephone number is (703) 308-4904. The

examiner can normally be reached on M-F from 8:30 - 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Nestor R. Ramírez can be reached on (703) 308-1371. The fax phone numbers for

the organization where this application or proceeding is assigned are (703) 305-3432 for regular

communications and (703) 305-3432 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 308-0956.
